

Claims

1. Modular galley for an aircraft or train, comprising:
 - a wall provided with a multiplicity of guides running in the vertical direction with undercut slots;
 - a multiplicity of modules with runners on the rear that can be accommodated in the undercut slots;
 - lifting means for raising or lowering a said module, the runners of which have been accommodated in a said undercut slot, over the wall.
- 10 2. Modular galley according to Claim 1, wherein the runners are undercut correspondingly to the slots.
3. Modular galley according to Claim 2, wherein the slots are widened in places such that a said undercut runner can be inserted here in the horizontal direction so as then to hook into the respective undercut slots.
- 15 4. Modular galley according to Claim 3, wherein the widened sections of the slots are at a height above the floor of the galley such that a module placed on the floor in front of the slot concerned completely overlaps the widened section.
5. Modular galley according to one of the preceding claims, wherein the slots, viewed in a horizontal plane, have an essentially T-shaped form, the leg of the T pointing away 20 from the wall.
6. Modular galley according to one of the preceding claims, wherein the runners are shaped like a mushroom.
7. Modular galley according to one of the preceding claims, wherein the lifting means comprise a spindle that runs vertically in the wall with a lifting arm that projects from the wall and can be moved along the spindle by means of matching internal screw thread.
- 25 8. Modular galley according to one of the preceding claims, comprising locking means that are provided on the wall and on each module and interact with one another, for fixing a said module at a specific height.
9. Modular galley according to Claim 8, wherein the locking means comprise a pin 30 that is provided on the wall or the module and can be slid in the horizontal direction as well as a pin seat provided in the module or the wall, respectively.
10. Modular galley according to one of the preceding claims, wherein the wall and

one or more of said modules are provided with connecting means for air, water, data exchange and/or power.

11. Module galley according to one of the preceding claims, comprising a number of vertical sections alongside one another, with, per section:

- 5 • at least two of said guides with slots;
- in the wall, at least one air, water and power connector and optionally at least one data bus; and
- lifting means.

12. Modular galley according to one of the preceding claims, further comprising one 10 or more service trolleys placed underneath a said module.

13. Wall for a modular galley according to one of the preceding claims.

14. Module for a modular galley according to one of the preceding Claims 1 - 12.

15. Aircraft provided with a wall according to Claim 13 or with a modular galley according to one of Claims 1 - 12.

16. Train provided with a wall according to Claim 13 or with a modular galley according to one of Claims 1 - 12.
